## 3D Wrap Design Panels

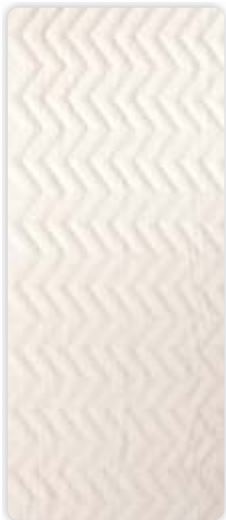

PVC wrap doors are very popular to create a modern and elegant look. PVC wrap doors are durable and easy to clean. Vacuum-sealed or Vinyl-wrap doors are made with a substrate as per a painted door with a few exceptions.

These doors are made by coating the substrate with glue and the vinyl is applied and vacuum pressure is applied to the inside of the doors. The vinyl is then drawn to the shape of the substrate by suction. Vinyls are available in a variety of colours and are quite robust. Today's PVC wrap doors are a great improvement from when they were initially introduced.

When purchasing doors for your kitchen cabinets consider using Vinyl wrap doors as an alternative with a wide selection of colors and styles available.

**Board Express currently has a variety of designs and styles to select from. Please visit our showroom in Marburg to view our full range.**

# Post Form Tops

Laminate counter tops are a winner for its affordability, customizable edges, low-maintenance, and stain resistance. Today's high-definition designs and unique finishing options keeps it a front-runner with many homeowners.

Formica HPL is fabricated by laying up sheets of resin-impregnated kraft paper together with a resin-impregnated décor paper for the surface. These sheets are then pressed together under high heat and pressure whereby the resins bond the construction together into a homogenous decorative laminate.

## NovaDecor

Our range of decorative High Pressure Laminates, Continuous Pressure Laminates and Compact Laminates made to meet the exacting demands for shopfitting, kitchen and furniture applications.

Our high pressure Laminate is designed for horizontal and vertical application and is HGP (postforming grade) PHL/EN438-3.

We offer a comprehensive range of fashionable colours and designs with a selection of finishes from low glare to high gloss finishes. Our post form tops are available in 16mm as well as 32mm.

### Post Form Top Sizes Available:

Length	Width	Bull Nose	Thickness
3600mm x	600mm	x 1L x	32mm
